**INTANGLES**  
A DIGITAL TWIN COMPANY

# Our Solutions

We are helping over 21,000 fleet operators across 17 countries in monitoring, benchmarking, and implementing predictive maintenance strategies for their assets, ultimately enhancing overall uptime and profitability.

## Improve Safety

Monitor driving behavior exceptions to encourage safe driving habits and reduce crash events. Implement collision prevention and emergency response systems under adverse conditions to avoid safety incidents.

## Equipment Maintenance

Track equipment performance and condition to minimize downtime and extend equipment life.

## Fuel Optimization

Receive real-time insights on fuel monitoring and optimization solutions to reduce fuel costs.

## Equipment Performance

Track equipment usage and performance, operator performance, and maintenance scheduling to maximize productivity.

## Compliance Monitoring

Receive real-time data on emissions and other key metrics to streamline regulatory reporting processes and ensure regulatory compliance.

## Environmental Compliances

Monitor and reduce inappropriate driving instances, such as idling, hard braking, and improper gear utilization, that contribute to excessive fuel usage, leading to violations of CO2 emissions.
